CAREER OBJECTIVE

Final-year engineering student (Internet of Things) with a clear interest in data analysis and data-based decision making. I aim to pursue an MBA in Business Analytics to combine technical skills with business understanding and build a career in analytics and management.

EDUCATION

Bachelor of Technology – Internet of Things (IoT)

G. H. Raisoni college of Engineering, RTMNU University

2022-26

SKILLS

Technical: Java, HTML, CSS, JavaScript, SQL, Computer Network, DBMS, Cloud, Operating System

Tools: VS code, GitHub, Power BI, Excel

Soft Skills: Willingness to learn, Problem solving, Decision making, Logical approach

ANALYTICS SKILLS

- Understanding how data supports business and management decisions
- Types of analytics: Descriptive, Predictive, Prescriptive
- Basics of statistics
- Basics of KPIs and performance metrics

CAREER INTERESTS

- Business Analyst, Data Analyst, Analytics & Strategy roles

PROJECTS

Smart Attendance and Automation

- Developed a Smart Classroom System using face recognition and IoT to automate attendance and control classroom appliances.
- Stored attendance records in a cloud database for real-time access and monitoring.
- Designed the system to support data-based decisions for classroom management and resource usage.

 Software: Anaconda, Python, OpenCV, SQLite, Arduino IDE, HTML, CSS, JavaScript

 Hardware: ESP8266 NodeMCU, Web Camera, Relay Module, Servo Motor and Power Supply

CERTIFICATIONS

Certificate for the Completion of Python 3.4.3 Training by IIT BOMBAY –July'2025 (link).

RDBMS PostgreSQL Training by IIT BOMBAY – Jan'25 (link).
